User Guide
SDK Version

The professional version of **Document Printer** is named **Document Converter (docPrint Pro)** that provides two more methods of converting documents than **Document Printer**. **Document Converter** has all the functions of **Document Printer** including the two virtual printers.

### System requirement

- Windows 2000 / XP / Server 2003 / Vista / Server 2008 / 7 / Later Operating Systems of both 32-bit and 64-bit

### Key Features

#### Virtual printers

- **Document Converter** has all the functions that are developed in **Document Printer**. It has the two virtual printers, **docPrint** and **docPrint PDF Driver**. With the two virtual printers, you can convert a printable document to more than fifty formats. Visit **Document Printer**'s page to get more information about the functions.

#### Graphical User Interface

- **Document Converter** provides a graphical user interface (GUI) for converting documents of commonly used formats into popular formats. With the GUI, you can set the conversion options and implement batch conversion operations.

#### Command line operations

- As the professional version of **Document Printer**, **Document Converter** has a command line supported executable in the installation directory. With the command line operation, you can get more flexible operation options and use the application in situation, for example, within batch script.

### Features of Document Converter

**Document Converter** has more functions beyond those of **Document Printer**, a graphical and a command line interface:
